

# 2023 EAAE Congress in Rennes, France

## August 29 – September 1, 2023

### Call for pre-congress workshops

The Local Organization Committee (LOC) invites proposals for Pre-Congress Workshops, which will be held on the first day of the EAAE 2023 Congress (Tuesday, August 29 2023, from 9:00 AM to 1:00 PM), prior to the official opening of the congress, at the congress venue in Rennes.

All topics relevant to agricultural economics are welcome. Workshop submissions are due by **April 1, 2023**. Due to limited space, in case of a large number of workshop proposals, the latter will be accommodated on a first come – first served basis. Please use the [Pre-Congress Workshop Proposal Form](#) to submit your proposals.

We offer parallel rooms, each hosting 40 to 150 participants, the necessary equipment for presentations, and a coffee break. Profit from the largest gathering of agricultural economists in Europe – the EAAE congress – to organize a meeting for your research project or a thematic workshop, to disseminate the results of a project or expertise, promote/popularize the use of a model, a statistical software, a database and much more.

We offer two workshop formats:

- (i) **Participation based on invitation** – The workshop organizer establishes independently the list of workshop participants, informs the LOC on the number of participants, the number and size of rooms needed for the workshop. [Workshop organizers will pay a lump sum based on these criteria.] This format suits mostly project meetings and thematic workshops with selection criteria.
- (ii) **Open participation** – Upon registration, congress participants are offered the choice to register for the workshop against an additional fee. This format suits mostly workshops aimed at disseminating project results or focusing on a specific model, software, database.
