VISIT AN AGRICULTURAL COOPERATIVE AND DISCOVER THE BRETON COAST

Study Tour 01 (ST01)

COOPERL

Cooperl

Managing Director: Emmanuel Commault

Cooperl is a leading French cooperative in the pork sector with a strong dynamic of innovation in animal welfare and the environment.

<https://www.cooperl.co.uk/>

We will start our tour with a presentation of the activities of the environmental branch of Cooperl (water treatment, waste recycling, renewable energies, ...) in an immersive space located in the heart of the industrial site in Lamballe.

We will pursue the tour by discovering the Breton coast through the visit of the charming town of Pléneuf-Val-André and its port which was built in the 19th century to receive large fishing vessels.

This visit will allow you to discover two pillars of the Breton economy: the food industry and tourism

Capacity to accommodate: 30

Information to know: Return at 7:00 pm at the earliest

Lunch: a packed meal will be offered before the departure

Contact persons:
fabienne.femenia@inrae.fr
elodie.letort@inrae.fr

Bus n°: 2

Starting place: **Rue de Juillet, Rennes**

Starting hour in Rennes: **1:40 pm**

Duration of the visits: 3h (1h30 each)

Arrival times in Rennes: 7:30 pm

INRAE  

VISIT A PIG BREEDING FARM FOCUSING ON ANIMAL-WELFARE AND DISCOVER THE BRETON COAST Study Tour 02 (ST02)

LE GOUESSANT

Managing Director: Rémi Cristoforetti

The Le Gouessant cooperative deploys a new pig breeding concept that reconciles better living and working conditions with sustained performance.

<https://www.legouessant.com/>

We first propose a guided tour of the pilot farm in Plestan to learn about the Physior concept: the pigs live in partly open buildings and have access to the open air via corridors. The breeding is organized in several, partially adaptive spaces to respect the animals' physiological needs. Launched in July 2022, the project is sustained by a long-term contract with the E.Leclerc distribution centers.

After the farm visit, we will stop at the Breton coast to discover the charming town of Pléneuf-Val-André and its port built in the 19th century to receive large fishing vessels.

You will discover two aspects of the Breton economy: innovation in pig breeding and tourism

Capacity to accommodate: 30

Protecting clothes will be provided, no showering necessary at the farm

Lunch: a packed meal will be offered before the departure

Contact persons:

VISIT A COMPANY SPECIALIZED IN NATURAL ALGAE-BASED SOLUTIONS AND JOSSELIN CASTLE Study Tour 03 (ST03)

OLMIX GROUP

Managing Director: Jean-Christophe JUILLIARD

Olmix Group is developing an international ecosystem of partners to grow plants and to raise animals in an agri-ecological transition plan.

<https://www.olmix.com/>

In the heart of Brittany, near Loudeac, Josselin and Pontivy, in a bocage landscape, is implanted the company OLMIX. You will visit the 600 m² pilot plant for developing new technological processes, different types of extraction and complexation reactions, in particular to create new materials blending trace elements, clays and algae.

Algae: A source of health at each step of the food chain

Capacity to accommodate: 40

FROM FARM TO FORK! TWO EXAMPLES OF LOCALLY ROOTED ORGANIC AGRI-FOOD PRODUCERS Study Tour 04 (ST04)

PRADENN and DRAO

Julien Sauvée (PRADENN) and Rozenn Mell (DRAO)

PRADENN is a 80-hectares diversified organic family farm. DRAO is a brewery that offers organic craft beers from barley produced on the farm.

<https://www.lespaniersdepradenn.fr/accueil/>
<https://brasserie drao.com>

PRADENN and DRAO are both located in Melesse, 15km away from Rennes. PRADENN is a strongly locally rooted farm with organic pig farming, Highlands cows, cereals and orchards. Julien will share with us his philosophy, explaining why he has turned to organic farming that favors autonomy. DRAO produces 100% traditional, local organic beers from barley produced on the farm. We will visit the production facilities and Cécile will explain us the brewery process, from barley to beer. Both sell their products through short-distance distribution channels in Rennes and around.

You will have the opportunity to enjoy tasty local and organic apple juice, cider and beers!

Capacity to accommodate: 40

Closed shoes mandatory

Lunch: a packed meal will be offered before the departure

VISIT REGIONAL VEGETABLE PRODUCTION AND THE CITY OF SAINT-MALO

Study Tour 05 (ST05)

Terres de St-Malo

Managing Director: Clarisse GALET

80 vegetable farms adapt their production and logistics tools to guarantee the quality of vegetables and take care of the environment.

<http://www.terres-de-saint-malo.com>

Terres de St-Malo offers you a visit to discover the activity of this agricultural cooperative which produces regional vegetables. The quality control of vegetables is ensured up to product delivery. The visit will help you to understand how the cooperative intends to control market risks and adapts the supply of its producers to the evolution of national and European demand taking into consideration the climate change. At the end of the visit, a vegetable snack will be offered.

After the study tour you can explore Saint-Malo on and/or enjoy the beach on your own.

50% of production volume of cauliflower is exported to Northern Europe due to its popularity

Capacity to accommodate: 50

Information to know: Take your swimsuit in case you go to the beach

VISIT THE FARM-TO-FORK MODEL BY VALOREX AND BLEU-BLANC-COEUR AND THE FOUGERES CASTLE Study Tour 07 (ST07)

Valorex

Managing Director: Stéphane Deleau

For 30 years, Valorex is deploying the extraordinary natural potential of local production and transformation of linseed and protein-rich seed.

La Messayais, 35210 Combourtillé
contact@valorex.com

During the visit of our plant, you will discover our organization to deploy this farm to fork model by Valorex and Bleu-Blanc-Coeur, with our scientific base, state recognition, obligation of means and results all along the food chain. Of course, you will visit our industrial plant from the supply of our raw materials to the original industrial process. You will also be able to taste food products from the Bleu-Blanc-Coeur nutritional food chain.

Today, Valorex puts its know-how and its original economic model at the service of all agricultural actors, to improve human nutrition, animal health and environmental impacts. The development of the Bleu-Blanc-Coeur label for 20 years, is a proof of economic concept based on a new agricultural and food model.

Capacity to accommodate: 20

Information to know: Comfortable shoes are recommended for the visit of Valorex

VISIT A FARM SPECIALIZED IN ALTERNATIVE PIG BREEDING AND THE MEDIEVAL CITY OF DINAN Study Tour 09 (ST09)

Ker Angel

Managing Director: Franck Aubry - Laurent Dartois

Agromousquetaires, the leading producer of retailer brands and the industrial division of the group Les Mousquetaires, invites you to discover the Ker Angel farm and meet the breeder Laurent Dartois.

Biterne 22250 Broons

The participants will discover the solutions integrated into the project (co-financed by Agromousquetaires): pigs raised without antibiotics from birth and without GMOs, soybeans without deforestation (optimized ration), weaning on the spot, feeding on straw, energy-saving building. A visit to this farm, which currently has 300 sows and 7,500 pigs raised per year, will allow you to see an example of breeding that is part of an agricultural and agri-food world in transition. The participant will also have the opportunity to explore the beautiful old town of Dinan.

Alternative pig breeding : a response to numerous environmental and societal issues of animal welfare.

DISCOVER A FARM COMBINING ANIMAL AND BIOGAZ PRODUCTION AND THE UNUSUAL OF RENNES Study Tour 10 (ST10)

SCEA Reims, 35850 Gévézé

Managing Director: François Trubert

F. Trubert produces cow milk, poultry meat, arable crops and biogas on his farm. He also co-founded the French Association of Farmers Producing Biogas

<https://www.terresdebreizh.bzh/producteurs/ferme-de-reims/>

François Trubert will present how he organizes the production of cow milk, chicken, turkey, guinea fowl, fodder crops, grain crops and biogas on Reims farm, which is located in Gévézé, 25km from Rennes downtown. In particular, he will explain how he breeds bacteria in two large digesters for transforming manure and other wastes into biomethane injected in the public gas grid. François Trubert is a passionate farmer and active promoter of onfarm biogas production. As a co-founder of the French Association of Farmers Producing Biogas, he has witnessed the development of biogas production in France since its start. Then you will enjoy the unusual of Rennes.

GUIDED TOUR OF THE PARLIAMENT OF BRITTANY, THE MOST FAMOUS MONUMENT IN RENNES Study Tour 13 (ST13)

Parliament of Brittany

<https://www.tourisme-rennes.com/en/discover-rennes/history-rennes/the-parliament-of-brittany/>

Visit the most famous monument in Rennes, a major piece of 17th century architecture and symbol of Brittany, which served as a court of justice until the French Revolution and hosts today the Rennes court of appeal. Built under the reign of King Louis XIV and reconstructed after the great fire of 1720 by the chief architect of King Louis XV, it was greatly damaged by the fire of 1994. Magnificently restored, it permits today visitors to admire fine examples of 17th-century French pictorial art: painted ceilings, sculpted gilded wood panels, and allegorical paintings, culminating in the splendid
